

HSF, offers advanced Attitude Heading Reference Systems. offers advanced Attitude Heading Reference Systems. The design is based on state of the art **MEMS** sensors and electronics merged with high level sensor fusion algorithms.

HSF AHRS can be adapted to the custom performance and interface requirements of multiple platforms and systems.

Among HSF navigation products are:

- HPA
- [X-HPA](#)

HSF's navigation solutions use sophisticated sensor fusion algorithms and modular design principles, thus achieving ease of integration into larger systems and missions.

The compact, reliable and affordable units can be deployed in manned and unmanned platforms.
